

HELLO!

How can we create an identity that promotes the message of wonderment and sparks creative responses through artistic and scientific exploration?

OPEN
Tuesday

The Junior Center is a place where children can learn through active wonder and creative exploration. We encourage children to appreciate the importance of art and science in their lives and the world around them. We hold up these values by creating opportunities for children to make experiences that take place at our center and throughout the community.

Sign up.
Visit juniorcenter.org or stop by to learn more

Visit.
